## Experience

---

**Foxconn** El Salto, Jalisco Mexico  
Test Analyst May 2025 - Today

- Debug servers that do not successfully pass stress tests and identify possible solutions
- Replace network cards, processors, motherboards, etc. on servers that present errors during testing
- Give attention to servers when they require a control panel test, jumper replacement or cable verification
- Relocating servers to another bay when infrastructure problems arise

**IBM** El Salto, Jalisco Mexico  
Test Analyst February 2025 - May 2025

- Prior to the Foxconn acquisition I performed the same tasks in IBM

**IEPC** Tonalá, Jalisco Mexico  
QA Tester and Data capture March 2024 - July 2024

- Captured, organized, and verified vote data during website testing to ensure accurate results in simulated election environments
- Collaborated with developers to report and resolve functionality problems, improving site performance and user experience

## Education

---

### Computer Engineering

August 2020 - July 2024

Technological University of  
Guadalajara, UteG

## Skills

---

**Techniques:** Python, Django, AWS, Java, JS, HTML, CSS, Docker

**Languages:** English B1, Spanish

## Profile

---

I'm a Computer Engineer with a solid background in Python. Competent in database implementation, data structure and deployment of technological solutions. I am looking to apply my programming knowledge in an innovative company where I can contribute to challenging software development projects and continue growing professionally.
